1. INTRODUCTION

These terms and conditions (hereinafter the “Terms”) is published on the Website being globexsci.io constitute the legal relationship and agreement between you, a legal entity or individual person, (hereinafter – “you” or the “Donator” individually and “Donators” collectively), and the Globex SCI project team (hereinafter - the “Company”), in respect of your donations (“hereinafter – the Donations”), receiving and holding the GSI Tokens (as they are described in Paragraph 3 of this Terms), and your use of the Website.

2. THE CROWDFUNDING DONATION CAMPAIGN

2.1. The “Crowdfunding Donation Campaign” (hereinafter - “Crowdfunding Donation Campaign” or the “CDC”) refers to the period specified on the Website, during which the Company will be receiving Donations from Donators, sent to the Company in exchange for GSI Tokens according to the current exchange rate. The main goal of the CDC is the crowdfunding for financing the Globex SCI project that is more detailed specified in the White Paper of the project.

2.2. Participation in the CDC is voluntary. No person will be deemed as committed or obliged to participate in the CDC or purchase any GSI Tokens or visiting the Website, registering himself/herself with the Website, requesting or reading any materials (such as this Terms or the Whitepaper) made available by the Company or communicating with the Company in any manner.

2.3. By clicking the “I Accept” button or checking the checkbox presented with the Terms, you are, out of your own free will, agreeing that you are taking participation in the CDC under the Terms set forth in detail in this document and White Paper at your own risk. If you are contributing to the CDC for another entity or any third party, such as the company you work for or represent, you hereby warrant that you have legal authority to bind that entity to these Terms as set forth in this document.

2.4. By contributing to the CDC, you expressly agree to all of the Terms set forth in this document. If you do not understand or do not agree to the Terms, you should not take any part in the CDC.

3. DESCRIPTION OF LEGAL NATURE OF GSI TOKENS

3.1. GSI Tokens are the cryptographic tokens that serve as a proof of participation in the CDC and gives the opportunity to obtain services and products using the GSI Tokens (after the end of CDC), as described in the Whitepaper. During the CDC, the GSI Tokens are sent by the Company to the Donator’s Globex SCI wallet in exchange of Donations according to the current exchange rate specified by the Company on the Website. By nature, GSI Tokens is NOT and shall in NO case be understood, deemed, interpreted or construed as:

- (a) any kind of currency or money, whether fiat or not;
- (b) equity interest, voting or non-voting securities (or its like) in, or claims against, the Company or any other entity in any jurisdiction;
- (c) equity or debt investment of any kind in any venture;
- (d) stocks, bonds or stocks, bonds or any securities/class of securities;
- (e) any form of financial derivatives;
- (f) any commercial paper or negotiable instrument;
- (g) any form of investment contract between the relevant holder and any other person;
- (h) any commodity or asset that any person is obliged to r edeem or purchase; or

This document is not a solicitation for investment and does not pertain in any way to an offering of securities in any jurisdiction.

- (i) any note, debenture, warrant or other certificate that entitles the holder to interest, dividend or any kind of return from any person.
- (j) the rights under the price difference (margin) contract or any other contract whose purpose or its intended purpose is to ensure profit or avoid losses;
- (k) Structural units in the collective investment mechanism / the institution of joint investment - structural units (units) in the trust unit investment fund / in the trust investment fund;

3.2. The Company might predict the growth of the GSI Tokens rate that could be specified in the Whitepaper, on the Website or other materials provided by the Company, or even orally. However, such prediction should not be in any way perceived as a promise for such growth, promise of profit or proposal for investment.

4. RISKS OF PARTICIPATION I N THE CROWDFUNDING DONATION CAMPAIGN

4.1. Participating in the CDC carries significant financial risk. This document is not, under any circumstances, a solicitation for investment and does not pertain in any way to an offering of securities in any jurisdiction.

4.2. The Company believes that there are numerous risks involved in the development, maintenance and running of the Globex SCI, many of which are beyond the control of the Company. Each Donator should peruse, comprehend and consider carefully the risks described below in addition to the other information stated herein before deciding to participate in the CDC.

4.3. Participating in the CDC shall be an action based upon prudent decision and will be deemed as the relevant Donator having been fully aware of and agreed to take all the risks below:

- Risk of abandonment / lack of success

The creation and issue of the GSI Tokens and the development of the Globex SCI may be abandoned for a number of reasons, including lack of interest from the public, lack of funding, lack of commercial success or prospects (e.g. caused by competing projects). You therefore understand and accept that there is no warranty or assurance that, even if the Globex SCI is partially or fully developed and launched, you will receive any benefits through the GSI Tokens that you hold;

- Regulatory Measures

Crypto-tokens are being, or may be, overseen by the regulatory authorities of various jurisdictions. The Company may receive queries, notices, warnings, requests or rulings from one or more regulatory authorities from time to time, or may even be ordered to suspend or discontinue any action in connection with the CDC, the Globex SCI development or the GSI Tokens. The development, marketing, promotion or otherwise of the Globex SCI or the CDC may be seriously affected, hindered or terminated as a result. And since regulatory policies could change from time to time, existing regulatory permission or tolerance on the Globex SCI or the CDC in any jurisdiction could be just temporary. GSI Tokens could be defined from time to time as virtual commodity, digital asset or even securities or currency in various jurisdictions and therefore could be prohibited from being traded or held in certain jurisdictions pursuant to local regulatory requirements;

- Cryptography

Cryptography is evolving and cannot guarantee absolute security at all times. Advances in cryptography, such as code cracking, or technical advances such as the development of quantum computers, could present risks to all cryptography-based systems including the GSI Tokens. This could result in the theft, loss, disappearance, destruction or devaluation of the GSI Tokens held by any person. To a reasonable extent, the Company will be prepared to take proactive or remedial steps to update the protocol underlying the GSI Tokens in response to any advances in

This document is not a solicitation for investment and does not pertain in any way to an offering of securities in any jurisdiction.

cryptography and to incorporate additional reasonable security measures where appropriate. The future of cryptography or security innovations is unpredictable while the Company will try its best to accommodate the continuing changes in the domains of cryptography and security;

- Development Failure or Abortion

The Globex SCI is still in the process of development, rather than a finished product ready to launch. Due to the technological complexity of the Globex SCI system, the Company could be faced with unforeseeable and/or insurmountable difficulties from time to time. Accordingly, the development of the Globex SCI could fail or abort at any time for any cause (including insufficiency of funds). The development failure or abortion would result in non-availability of the purchased GSI Tokens for CDC to any Donator;

- Theft of Crowdfunding Donation Campaign proceeds

There may be attempts to steal the CDC proceeds received by the Company (including the fiat currency amount converted therefrom). Such a theft or attempted theft may impact the ability of the Company to fund the development of the Globex SCI. While the Company will adopt cutting-edge technical solutions to keep the CDC proceeds safe, certain cyberthefts could be hardly unpreventable;

- Flaws in Source Code

Nobody can guarantee the source code of the Globex SCI to be flaw-free. It may contain certain flaws, errors, defects and bugs, which may disable some functionality for users, expose users' information or otherwise. Such flaws, if any, would compromise the usability, stability, and/or security of the Globex SCI and consequently bring adverse impact on the value of GSI Tokens. Open source codes rely on transparency to promote community-sourced identification and solution of problems within the code. The Company will work closely together with the community to keep improving, optimizing and perfecting the source code of the Globex SCI onwards;

- Cyber Attacks

There is a risk for cyber-attacks from time to time. Such attacks will adversely affect, stagnate or paralyze the network of the Globex SCI system or related software systems, which might negatively affect the Globex SCI and GSI Tokens in unpredictable way. Each Donator shall take care of the security of his/her registered email and registered account throughout by taking such actions as: (i) using a highly secure password; (ii) refraining from opening or responding to any scam emails; and (iii) keeping strictly confidential all the secret or personal information about himself/herself;

- Loss or Destruction of the Private Key of GSI Tokens Wallet

The loss or destruction of a private key required to access GSI Tokens Wallet may be irreversible. GSI Tokens are controllable only by possessing both the relevant unique public and private keys through the local or online GSI Tokens wallet. Each Donator is required to safeguard the private keys contained in his/her own GSI Tokens wallet(s). Where such private key of a Donator is lost, missing, divulged, destroyed or otherwise compromised, neither the Company nor anyone else will be able to help the Donator access or retrieve the related GSI Tokens;

- The GSI Tokens's depreciation and inflation

No one, including the Company, can predict with absolute accuracy where the token rate will go. The possible inflation of GSI Tokens could lead to the drop of market price, and consequently GSI Tokens holders (including the Donators) could suffer economic losses. It is not guaranteed that a Donator or GSI Tokens holder would be compensated or made good somehow for the GSI Tokens inflation;

- Liquidity

This document is not a solicitation for investment and does not pertain in any way to an offering of securities in any jurisdiction.

GSI Tokens is not a currency issued by any individual, entity, central bank or national, supra-national or quasi-national organization, nor is it backed by any hard assets or other credit. The circulation and trading of GSI Tokens on the market are not what the Company is responsible for or pursues. Trading of GSI Tokens merely depends on the consensus on its value between the relevant market participants.

Nobody is obliged to redeem or purchase any GSI Tokens from any GSI Tokens holder (including the Donator). Nor does anyone guarantee the liquidity or market price of GSI Tokens to any extent at any time. To divest his/her GSI Tokens portfolio, a GSI Tokens holder would have to locate one or more willing buyers to purchase the same at a mutually agreed price, which attempt could be costly and time-consuming and does not necessarily bear fruit. And there could be no cryptocurrency exchange or other marketplace having GSI Tokens listed thereon for trading;

- Price Volatility

Cryptographic tokens, if traded on public markets, usually have extremely volatile prices. Fluctuations in price over short periods of time frequently occur, which price may be denominated in Bitcoin, Ether, US Dollars or any other crypto or fiat currency.

Such fluctuations could result from market forces (including speculations), regulatory changes, technical innovations, availability of exchanges and other objective factors and represent changes in the balance of supply and demand.

The Company is not responsible for any secondary market trading of GSI Tokens, no matter whether or not there would be such markets for GSI Tokens.

Therefore, the Company neither is obliged to tame the price volatility of GSI Tokens nor cares about that. The risks associated with GSI Tokens trading price have to be taken by the GSI Tokens traders themselves;

- GSI Tokens is not allowed for exchange before the end of Crowdfunding Donation Campaign;

In addition to the risk described above, you must be aware that the GSI Tokens is not allowed for exchange or secondary market trading before the end of the CDC, i.e. this means that you will not have possibility to exchange or sell the GSI Tokens before the end of period designated by the Company on the Website, and if, ignoring this fact, you plan to do this, you should keep in mind that this is impossible;

- Use of GSI Tokens in restricted activities by third parties

Programs or websites banned or restricted in certain jurisdictions, such as gambling, betting, lottery, sweepstake, pornography and otherwise, could accept different crypto-currencies or tokens in their operation. The regulatory authorities of certain jurisdictions could accordingly take administrative or judicial actions against the very programs or websites or even the developers or users thereof. The Company neither intends nor is able to act as a censor to scrutinize to any extent any program or website that uses GSI Tokens with such goals. Therefore, any punishment, penalty, sanction, crackdown or other regulatory effort made by any governmental authority may more or less frighten or deter existing or potential users away from using and holding the GSI Tokens, and consequently bring material adverse impact on the prospect of the GSI Tokens.

- No guarantee of growth of the GSI Tokens rate;

The Company might predict the growth of the rate of the GSI Tokens that could be specified in the Whitepaper, on the Website or other materials provided by the Company, or even orally. However, such predictions could be incorrect, because they are based only on the subjective point of view of Company's specialists and, therefore, the growth of the rate of GSI Tokens could not be guaranteed in any way. Taking into account that the Company do not issue and propose GSI Tokens as an object for investments or speculative trading, some Donators, on their own discretion,

This document is not a solicitation for investment and does not pertain in any way to an offering of securities in any jurisdiction.

could decide to obtain the GSI Tokens for speculative means orienting on the Company's predictions of growth of the rate of GSI Tokens. However, it could happen that the rate of GSI Tokens drops or remains on the same level, that might lead to Donators financial losses.
